

# Mentor Spotlight

## Nathan Pearson-Smith

Nathan is the founder of 18 Ventures, a mission driven crypto VC firm that puts founders in a position to execute on what they do best, by delivering results in key areas where they lack expertise.

18 Ventures' focus is to bring out the best in founders, by allowing them to zero in on what they are great at, by taking the pressure off them having to work on tasks they are either not great at, or simply don't want to do but which they know are important. 18 Ventures specialises in supporting its portfolio companies with strategic expansion, business development and go-to-market launch.

In 2019, Nathan served as VP of Business Development at Stratx Consulting Inc., a strategic advisory and investment firm specializing in global liquidity solutions for select token projects.

In 2016 Nathan was a founding member, and lead Business Development at WhiteHat GB (now Multiverse) a U.K.-based ed-tech company focused on education and training, now valued at \$500m.
